

What is claimed is:

1. A cleaning composition for removing organic deposit comprising:

- a) a water miscible solvent;
- b) an inorganic salt; and
- c) water;

wherein from about 30 to about 70% weight of the total composition is comprised of the inorganic salt in crystalline form.

2. A cleaning composition according to claim 1, wherein the ratio of water miscible solvent:water is in the range of from 9:1 to 2:1.

3. A cleaning composition according to claim 1, wherein the ratio of water miscible solvent:water is in the range of from 8:1 to 5:1.

4. A cleaning composition as in claim 1, wherein said water miscible solvent is selected from the group consisting of one to five carbon mono-, di-, and tri-alcohols; alkylene glycol ethers; and dialkylene glycol ethers.

5. A cleaning composition as in claim 1, wherein said water miscible solvent is a one to five carbon alcohol.

6. A cleaning composition as in claim 1, wherein said inorganic salt is selected from the group consisting of sodium chloride, sodium bromide, magnesium bromide, magnesium chloride, potassium chloride, potassium bromide and zinc chloride.

7. A cleaning composition as in claim 1, wherein said inorganic salt is sodium chloride.

8. A cleaning composition as in claim 1, wherein said water miscible solvent comprises from about 15-50 wt.% of the total composition.

9. A cleaning composition as in claim 1, wherein said composition further includes a fragrance and a dye.

10. A cleaning composition as in claim 1, further comprising octoxynol-9.

11. A cleaning composition for removing organic deposit comprising:

- a) a water miscible solvent;
- b) an inorganic salt;
- c) water;
- d) a terpene;
- e) an anti-bacterial agent; and

f) at least one surfactant selected from the group consisting of anionic surfactant, non-ionic surfactant, amphoteric surfactant and mixtures thereof;

wherein from about 30 to about 70% weight of the total composition is comprised of the inorganic salt in crystalline form.

12. A cleaning composition as in claim 11, wherein said water miscible solvent is selected from the group consisting of one to five carbon mono-, di-, and tri-alcohols; alkylene glycol ethers; and dialkylene glycol ethers.

13. A cleaning composition as in claim 11, wherein said water miscible solvent is a one to five carbon alcohol.

14. A cleaning composition as in claim 11, wherein said inorganic salt is selected from the group consisting of sodium chloride,

sodium bromide, magnesium bromide, magnesium chloride, potassium chloride, potassium bromide and zinc chloride.

15. A cleaning composition as in claim 11, wherein said inorganic salt is sodium chloride.

16. A cleaning composition as in claim 11, wherein said water miscible solvent comprises from about 15-50 wt.% of the total composition.

17. A cleaning composition as in claim 11, wherein said composition further includes a fragrance and a dye.

18. A cleaning composition as in claim 11, further comprises octoxynol.

19. A cleaning composition as in claim 11, wherein said at least one surfactant comprises 0.05 to 10 wt%. of the total composition.

20. A cleaning composition as in claim 11, wherein said anti-bacterial agent comprises 0.01 to 3.0 wt%. of the total composition.

21. A cleaning composition as in claim 11, wherein said terpene comprises 2.5 to 20 wt%. of the total composition.

22. A cleaning composition for removing organic deposit comprising:

- a) a water miscible solvent;
- b) an inorganic salt
- c) water;
- d) a terpene;
- e) an anti-bacterial agent; and

f) at least one surfactant selected from the group consisting of anionic surfactant, non-ionic surfactant, amphoteric surfactant and mixtures thereof;

wherein from about 30 to about 70% weight of the total composition is comprised of the inorganic salt in crystalline form.

23. A cleaning composition as in claim 23, wherein the terpene is D-limonene.
